Your child may have been exposed to:

**Pneumococcal Infection**

Pneumococcus (*Streptococcus pneumoniae*) is a bacteria that can cause ear and lung infections.

If you think your child has a Pneumococcal Infection:

- Tell your childcare provider or call the school.
- **Need to stay home?**
  - **Childcare and School:**
    - No, if the child is healthy enough for routine activities.

**Symptoms**

Your child may have fever, ear pain, or pull on their ear. Sometimes there is ear drainage and redness. Your child may change behavior or eating habits.

**Spread**

- By coughing or sneezing.
- By touching secretions from the nose or mouth.

**Contagious Period**

Unknown.

**Call your Healthcare Provider**

- If your child has a high fever or ear pain that does not stop. Antibiotics may be prescribed.

**Prevention**

- Ensure your child has received pneumococcal vaccine.
- Cover nose and mouth when coughing and sneezing. Use a tissue or your sleeve. Dispose of used tissues.
- Wash hands after touching anything that could be contaminated with secretions from the nose or mouth. Your child may need help with handwashing.
- Clean and disinfect anything that comes in contact with secretions from the nose or mouth. Use a product that kills germs.
- DO NOT expose your child to second-hand tobacco smoke. Smoke increases the risk for serious respiratory infections and middle ear infections.
