

## CONJUNCTIVITIS (PINKEYE)

Conjunctivitis is redness and inflammation of the membrane (conjunctiva) that covers the eye and lines the inner surface of the eyelid. Pinkeye is a common infection in young children.

<b>CAUSE</b>	Bacteria, viruses, allergies, eye injuries, or chemicals.
<b>SYMPTOMS</b>	Includes redness, itching, pain and discharge, depending on the cause. Bacterial conjunctivitis can sometimes be distinguished from other forms of conjunctivitis by a more purulent (pus) discharge.
<b>SPREAD</b>	Touching the secretions from the eyes, nose, or mouth of infected persons.
<b>INCUBATION</b>	It takes about 1 to 12 days after exposure for symptoms to begin, usually 1 to 3 days.
<b>CONTAGIOUS PERIOD</b>	While symptoms are present.
<b>EXCLUSION</b>	<p><u>Childcare</u> and <u>School</u>:  <b>Purulent Conjunctivitis</b> (redness of eyes and/or eyelids with thick white or yellow eye discharge and eye pain): Until examined by a healthcare provider and approved for readmission.</p> <p><u>Childcare</u> and <u>School</u>:  <b>Nonpurulent conjunctivitis</b> (redness of eyes with a clear, watery eye discharge but without fever, eye pain, or eyelid redness): None, may be considered if child is unable to keep hands away from eyes.</p>
<b>DIAGNOSIS</b>	Recommend parents/guardians call their healthcare provider if their child has redness of eyes and/or eyelids with pus and/or fever or eye pain.
<b>TREATMENT</b>	Antibiotic treatment (eye ointment or drops) is occasionally prescribed. If the infection appears to be viral, no specific antiviral treatment is usually needed.

### PREVENTION/CONTROL

- Cover nose and mouth when sneezing or coughing. Use a tissue or your sleeve. Dispose of used tissues.
- Encourage children not to rub eyes. Keep the child's eyes wiped free of discharge. Avoid contact with eye drainage.
- Wash hands thoroughly with soap and warm running water after contact with eye drainage. **Thorough handwashing is the best way to prevent the spread of communicable diseases.**
- DO NOT share any articles, such as towels and washcloths, eye makeup, contact lens solution, or eye drops.
- Clean and sanitize mouthed toys, objects, and surfaces at least daily and when soiled.
